commenter\_subject: Regulation of Retail Forex

commenter\_comments:

                  Please do not pass the new  
regulation as it gives unfair advantage to those  
trading in foreign markets at 400:1 we are only  
trading at 100:1 and are properly managing this  
margin. There is no good reason to change the laws.  
Let the trader decide how much margin to use . It  
is extremely well explained at all the us  
brokerages for all to understand.

This new regulation will keep those of us who are  
trying to get ahead from succeeding.

Sincerely,

Emilio Alvarez
