Subject: Regulation of Retail Forex

RIN 3038-AC61

Dear David,

This proposal is absolutely ludicrous and I am strongly opposed to it. You will ruin not only retail traders, but businesses that have been built on the US Forex Retail trader market. As if restrictions weren't already tough on US Forex brokers, the CFTC now wants to make it almost impossible for retail traders to get into the foreign exchange....ridiculous!

You will cost us our jobs, businesses, and years of hard work. I don't understand the reasoning behind this and am strongly urging the proposal to be revoked.
