Subject: RIN 3038-AC61

The current proposal , RIN 3038-AC61 is an infringement on our right to choice, I'm very concerned and tired of government trying to act as my Guardian Parents ! This is nothing short of another power play by government authority . From what I have seen this act is trying to steer people out of the Forex and into Futures or worse the failing , unstable stock market. This proposal is unnecessary and should be revoked .
