**Subject:** Regulation of Retail Forex

---

To: U.S. Commodity Futures Trading Commission (CFTC)

I want to express my opposition to the change in leverage for Forex Trading which will be brought about by RIN 3038-AC61. With the current 100:1 leverage (one percent) being a margin requirement of \$1,000 I am able to trade the Forex Market, but if you raise it to a 10:1 leverage (10 percent) the margin requirement would rise to \$10,000 and stop me from trading with the amount of assets I have available to trade. If this regulation passes you will be hurting a lot of small investors and eliminate their trading opportunities in Forex Market.
