Subject: Regulation of Retail Forex

Do not regulate the retail forex trader! We understand the risk of losing money trading and it is our money that we trade with. If you feel like its your money that we are trading with then stop handing out bailouts. I don't need them anyway, I got my own money!

If you cut my trading to 10:1 then i can't make as much money anymore and will have to file for unemployment because you stopped me from making an honest living. Does that make sense?

Thank you
