**Subject:** Regulation of Retail Forex

---

Secretary,

I would like to voice my opinion that the new 10:1 regulation is a mistake. I have been trading Forex for years at 100:1 leverage which is suitable to the retail customer. If this is another proposal that has the democratic congress behind it then I recommend that would do well to ignore them. They will be gone in November and you will save us the hassle of moving our accounts to another country. I am currently now opening an account in Australia that allows 500:1. Thank you very much.

Tim Higgins
