Subject: Leverage

The change in leverage will make me invest outside of the United States. This idea will limit FOREX to the rich investor. I have been trading FOREX for five years. This idea is a bad one and it is not fair. 100 to 1 works well so why change it? It will only hurt the individual investor that works hard and does well at 100 to 1. 10 to 1 leverage will drive dollars away from the United States. This is not what America needs.

Jonathan Hackman, FOREX investor
