Subject: Regulation of Retail Forex

Dear Gentlemen,

do you think it's really necessary to cut the leverage in such a dramatic manner? Big leverage is a big advantage of Forex and, maybe, it's major attraction for the traders. If I would you, though I'm not, I would limit to 1:50 as maximum, because 1:10 is too little, I think. The leverage has been cut yet from 1:200 to 1:100, don't you find it sufficient to limit imprudent trading?

Sincerely yours,

Alex
