Subject: 'Regulation of Retail Forex'

Dear CFTC,

I just wanted to express my concerns regarding the proposed regulations to reduce the current leverage available to forex traders from 100:1 to 10:1

I personally think that you will lose a lot of income as most traders will most likely take their business to foreign countries. I'm already a foreign investor in the US and I for sure will take my business else-where if or when you do implement the change.

thx
Adnan
