Subject: Regulation of Retail Forex

To Whom It May Concern:

I am a retail Forex trader for over two years now and I have seen many rule changes. This proposed rule change in my opinion would hurt us and US Forex brokers. Forex brokers would go out of business and jobs would be lost. This could also force us to open accounts in other countries to just to trade. To fight fraud and protect the consumer could be done better by making stronger guidelines and controls to become a Forex broker.

Please don't pass this rule.

Thank you,
John L. Marchesani
