We STRONGLY disagree with the CFTC proposal. leverage restriction across the board to **10 to 1 leverage**.i says: "I am not opposed to regulation nor regulatory agencies. But that regulation needs to be **fair, transparent, and open to public input**. Otherwise it becomes corrupt and self-serving. Sure high leverage can get you into trouble if used thoughtlessly. Sure hedging when not done properly turns one loss into two. But I believe the cure is **EDUCATION**, not restricting what people can and cannot do with their investment decisions. Guide, don't dominate - government was invented to protect people and their property, not to limit their potential."
