Subject: Regulation of the Retail Forex Market

To Whom it may concern:

I would like to add my objections to the list of all who have voiced their views on the Regulation of the Forex Market. All this regulation will do is force investors to move their accounts off shore. I strongly object to any action that attempts to limit me in my legal efforts to provide income for my family. In a time when everyone is struggling to make a living we certainly don't need anything that will interfere with free enterprise and the entrepreneurial spirit.
