April 8, 2010

CFTC Comments

Dear CFTC Comments:

These derivatives markets are called "gambling," only it's hardly a gamble when taxpayers cover your losses while you keep your winnings. Our "financial services based economy" isn't an economy at all, it's organized crime, and it needs sunshine and plenty of it. The CFTC must adopt the Proposed Federal Speculative Position Limits as a MINIMUM initial step, leading to complete and full transparency of all financial dealings.

Sincerely,

Gary Chrisler
